- Prevents formation of mineral deposits
- Removes built-up mineral deposits
- Special non-toxic tablets clean as it steams
- Easy to use, no mess & no fuss
- Keeps vaporiser in top condition

*Cleans as it steams*

## Contents

Special non-toxic ingredients - to help keep vaporisers in top condition.

## When to Use

Use one tablet each time the vaporiser is used to maintain peak efficiency.

After every 3-4 times the vaporiser is used, add one Euky Bear Vaporiser Cleaning Tablet to the unit, placing in the corner of the water container. This may be sufficient to keep the electrodes and heating element free of mineral deposits.

In areas of hard or mineralised water, use one Euky Bear Vaporiser Cleaning Tablet each time the vaporiser is used. In places of especially hard water, it is recommended to add two Euky Bear Vaporiser Cleaning Tablets each time the vaporiser is used in order to keep the electrodes and heating element free of mineral deposits.

## Directions

Fill vaporiser with water to the required level and then place one tablet in a corner away from the heating module. Alternatively, crush and dissolve a tablet and add to the water. Operate the vaporiser in accordance with the manufacturer's instructions.

Although the water may become dirty, the steam produced will remain pure and clean. Discard water and wash out vaporiser after use.

## Precaution

Follow manufacturer's operating instructions. Not to be taken. Keep out of reach of children.

## Mineral Deposits

In heavy mineralised water, or if the cleaning tablets have not been used regularly, steaming may become slow or intermittent due to the formation of mineral deposits (scale) on the electrodes. The tablets will normally correct this problem within one or two uses.

## Presentation and Availability

Euky Bear Vaporiser Cleaning Tablets are packaged in a plastic container of 30 tablets.

Available from pharmacies
